Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

Objection to the Disclosure

37 CFR 1.163

The following is a quotation of section (a) of 37 CFR 1.163:

(a) The specification must contain as full and complete a disclosure as possible of the plant and the characteristics thereof that distinguish the same over related known varieties, and its antecedents, and must particularly point out where and in what manner the variety of plant has been asexually reproduced. In the case of a newly found plant, the specification must particularly point out the location and character of the area where the plant was discovered.

35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

As specific to United States Plant Patent applications, the specifics of 37 CFR 1.164 (reproduced below) are controlling:

The claim shall be in formal terms to the new and distinct variety of the specified plant as described and illustrated, and may also recite the principal distinguishing characteristics. More than one claim is not permitted.

In plant applications filed under 35 U.S.C 161, the requirements of 35 U.S.C. 112 are limited. The following is a quotation of 35 U.S.C. 162:

Detailed Action

No plant patent shall be declared invalid for noncompliance with section 112 of this title if the description is as complete as is reasonably possible. The claim in the specification shall be in formal terms to the plant shown and described.

The disclosure is objected to under 35 CFR 1.163(a) and under 35 U.S.C. 112, first paragraph, because the specification presents less than a full, clear, and complete botanical description of the plant and the characteristics which define same per se and which distinguish the plant from related known cultivars and antecedents.

More Specifically:

A. Page 1, line 17, and page 3, line 24, Applicant states "seedling". It appears the recitation --whole plant-- would be more appropriate in these instances.

B. Page 1, line 19, "PP" should be deleted as the recitation "US Plant Patent 13,189" is more than adequate in this instance.

C. Page 2, line 31, The double quotation marks should be deleted and --'-- should be set forth in its place.

D. Page 4, line 23 should be deleted as this recitation has been set forth at line 21 of the same page.

Detailed Action

E. Page 4, line 26, Applicant states “4 25 cm”. This recitation is unclear as it is not understood what applicant is intending. Correction and/or clarification is necessary.

F. Page 5, lines 16-19, Applicant sets forth information regarding the botanical characteristic “Calcar”. This is an unrecognized term. Applicant should review this term to see if this is what was intended. If such was intended, Applicant should describe the characteristic in the remarks section of the response to this Office action. If such was not intended, Applicant should set forth in the specification the appropriate botanical term for what applicant is describing.

G. Page 5, lines 27-29, Applicant should set forth in the specification additional information relative to the instant plant’s petals including the typical and observed petal base descriptor.

H. Applicant should set forth in the specification information relative to the instant plant’s sepals including the typical and observed sepal number, length, width, shape, apex, margin, and base descriptors, and coloration (both surfaces) with reference to the employed color chart.

I. Applicant should set forth in the specification meaningful information relative to the instant plant’s disease resistance/susceptibility.

Detailed Action

The above listing may not be complete. Applicants should carefully review the disclosure and import into same any corrected or additional information which would aid in botanically identifying and/or distinguishing the cultivar for which United States Plant Patent protection is sought.

Claim Rejection

35 U.S.C. 112, 1st & 2nd Paragraphs

Claim 1 is rejected under 35 U.S.C. 112, first and second paragraphs as not being supported by a clear and complete botanical description of the plant for the reasons set forth in the Objection to the Disclosure Section above.
